

Integration of Foundations and Limited Liability Partnerships into the Online-Services Portal

With effect from 01/03/16 all foundation and Limited Liability Partnership records will be integrated into the Guernsey Registry Online –Services Portal.

This system enhancement will mean users will be able to search for registered entities using one system (rather than the current mix of 3 separate registers) and will also be able to request and purchase copies of publically available documents more easily.

This phase of system enhancements will also result in the auto generation of certificates of registration.

The current application process for foundations and LLPs will remain, with forms available at www.guernseyregistry.com. Integration of application forms into the greg.gg online services portal is currently being costed for a future phase of system enhancements.

The system integration will enable users to purchase the following documents and allow them to be paid by debit/credit card or charged to their Registry account:

Foundations:

- Certificate of Good Standing (certified or electronic)
- Statement of the Register (certified or electronic) - includes details of the councillors and guardian (if applicable)
- Copies of Certificates of Registration

Limited Liability Partnerships

- Certificate of Good Standing (certified or electronic)
- Statement of the Register (certified or electronic)
- Copies of Certificates of Registration
